Asset Management Framework

Asset Management Policy

What is a Policy?

Articulates **Council's commitment to asset management** and provides **direction for staff** in carrying out all elements of the organization's asset management program.

Why is it important?

- **Signifies a** community's **commitment** to asset management
- Informs **consistent** asset management **practices** across the organization
- **Sets clear expectations** for developing and implementing a program

Asset Management Policy

(Community Name) Asset Management Policy

Policy Adopted (dd/mm/yyyy)

PURPOSE

This Policy articulates the (Community Name)'s commitment to effective asset management. The purpose of this Policy is to:

- Deliver infrastructure services in a way that meets established levels of service;
- Provide direction to help our community make decisions and prioritize core infrastructure needs;
- Provide direction for the consistent application of asset management by Council and staff; and,
- Reflect the organization's strategic goals with respect to managing infrastructure.

Asset management enables the protection of community-owned assets that deliver core community services, including the water system, wastewater system, solid waste, buildings and facilities, and vehicles and equipment (adjust as necessary).

ASSET MANAGEMENT POLICY STATEMENTS

Asset management is an organization-wide approach that encompasses many. The tangible assets of the (Community Name) are managed in accordance with the following principles and the policy statements that support them:

- | | |
|------------------------------------|--|
| a) Levels of Service | The (Community Name) has established and strives to deliver levels of service that: <ul style="list-style-type: none">• Comply with all legislated requirements;• Protect and uphold public safety, community well-being and the environment; and• Reliably meet the informed expectations of stakeholders and the public. |
| b) Informed Decision Making | Asset management decisions are based on sufficient, reliable and current inventory information. A consistent approach has been adopted for decision making, including data management, risk analysis, evaluating trade-offs, and record keeping. Decisions that guide capital planning are made with a holistic view of systems needs across all asset categories, integrated with existing policies, and balanced according to community priorities. Opportunities for regional collaboration are identified and leveraged. |
| c) Minimum Sustainable Cost | The (Community Name) strives to uphold service levels at the minimum sustainable cost by minimizing expenditures on |

Asset Management Policy

PURPOSE

This Policy articulates the (Community Name)'s commitment to effective asset management. The purpose of this Policy is to:

- Deliver infrastructure services in a way that meets established levels of service;
- Provide direction to help our community make decisions and prioritize core infrastructure needs;
- Provide direction for the consistent application of asset management by Council and staff; and,
- Reflect the organization's strategic goals with respect to managing infrastructure.

Asset management enables the protection of community-owned assets that deliver core community services, including the water system, wastewater system, solid waste, buildings and facilities, and vehicles and equipment (adjust as necessary).

Asset Management Policy

ASSET MANAGEMENT POLICY STATEMENTS

Asset management is an organization-wide approach that encompasses many. The tangible assets of the (Community Name) are managed in accordance with the following principles and the policy statements that support them:

a) Levels of Service

The (Community Name) has established and strives to deliver levels of service that:

- Comply with all legislated requirements;
- Protect and uphold public safety, community well-being and the environment; and
- Reliably meet the informed expectations of stakeholders and the public.

Asset Management Policy

CONTEXT AND INTEGRATION

The context and integration of asset management throughout the organization is formalized through references and linkages between corporate documents. Where possible and appropriate, Council and staff will consider this Policy and integrate it in the development or updating of corporate documents.

Asset Management Policy

KEY RESPONSIBILITIES FOR MANAGING THE ASSET MANAGEMENT POLICY

The performance of asset management is organization specific, reflective of knowledge, technologies and available tools, and will evolve over time. Council retains the sole authority to approve, update, amend, or rescind this Policy. Council has the authority to delegate implementation responsibilities to staff, while providing the resources necessary to support staff in performing delegated responsibilities.

A full list of responsibilities for implementing the Asset Management Policy is outlined below:

Area of Responsibility	Body Responsible
Ongoing review of policies, updating where needed	Council
Exercise stewardship of assets	Council
Establish a budget for asset management	Council, staff delegate

POLICY GUIDE
DRAFT

Asset Management Plan

What is an Asset Management Plan?

A document that describes how one or more **groups of assets** are to be **managed** over a period of time in order to **deliver** an agreed upon **standard of service**.

Why is it important?

- Provides details necessary to support decision-making
- Enables communities to maximize the value of existing infrastructure that delivers core community services

Asset Management Plan

7 Essential Elements

Adapted from InfraGuide: Managing Infrastructure Assets.

What do you own? —————→ Inventory

What is it worth? —————→ Valuation

What is its condition? —————→ Condition / Remaining Life

What needs to be done? —————→ Levels of Service / Initial Plan

When do you need to do it? —————→ Risk Assessment & Prioritization

How much will it cost? —————→ Revenue Requirements

How will you pay for it? —————→ Long Term Financial Plan

Asset Management Plan

Components

Executive Summary

1. Introduction
2. Current State of Assets
3. Level of Service
4. Risk Assessment and Criticality
5. Priorities
6. Cost Requirements
7. Long Term Financial Plan
8. Conclusions and Recommendations

Asset Management Plan

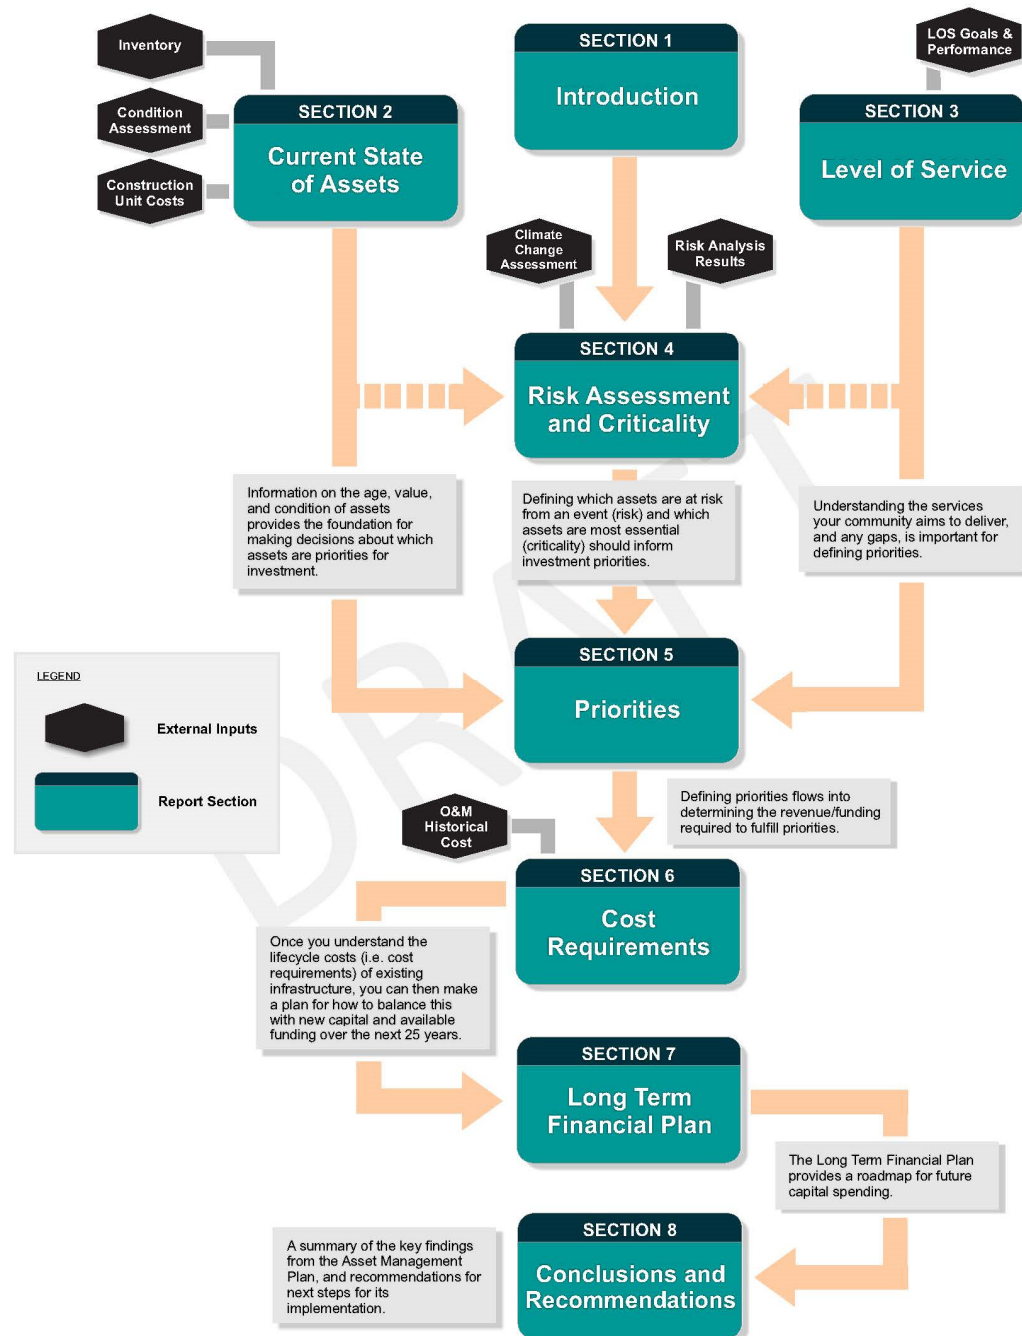

Example: Current State of Assets

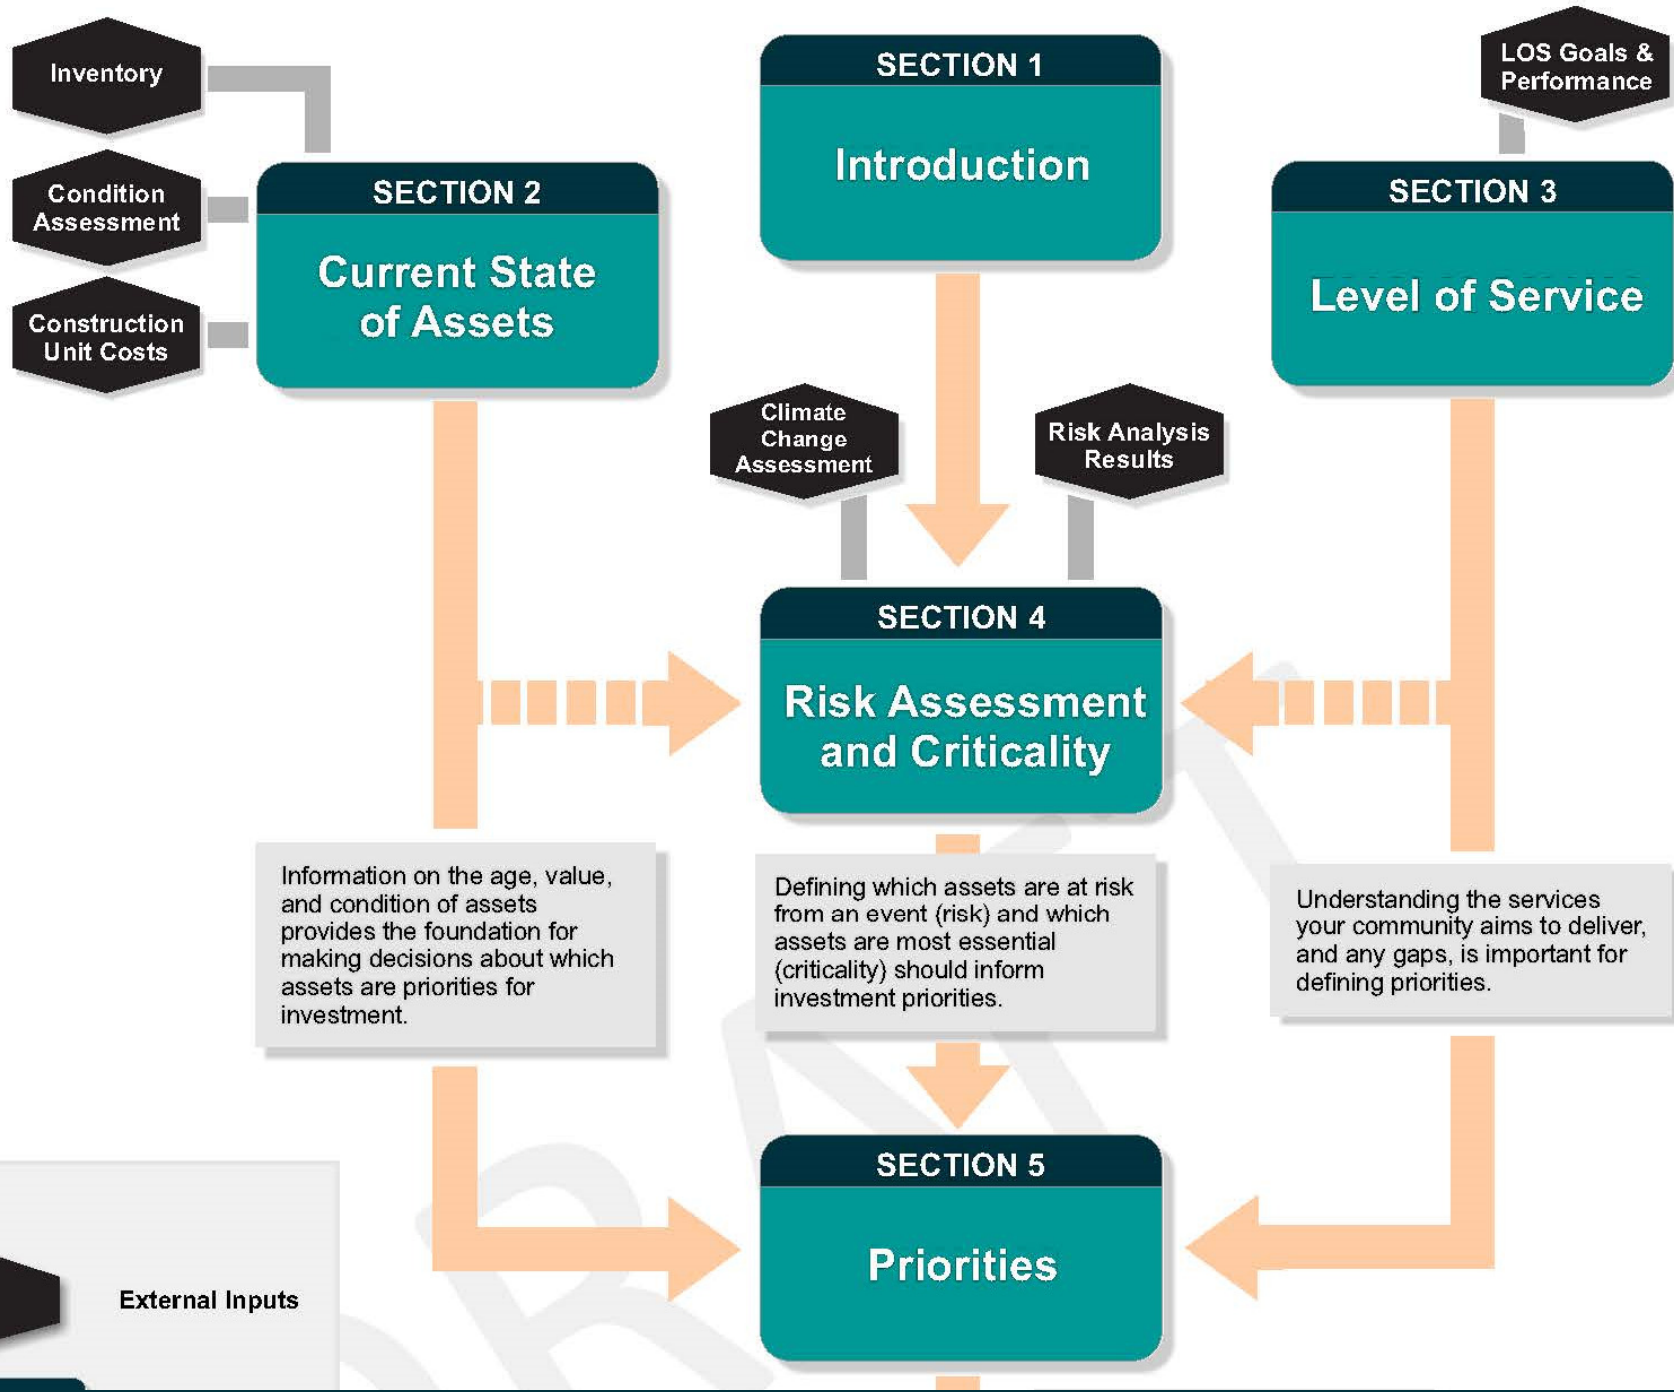

Remaining Life

The (Community)'s assets range in age from (youngest – oldest; eg. new to almost 50 years old), with an average age of approximately (number of years) years. On average, community assets have an estimated (00%) of their life remaining (weighted by value), meaning that (add comment here e.g. there is significant need for renewal in the near future). (Describe the asset category with the highest % remaining life). (Describe the asset category with the lowest % remaining life, and most urgent need for renewal).

A summary of the average percent remaining life assets in each asset category is shown in Figure X [\(sample\)](#).

Next Steps

- Feedback welcome!
 - AM Policy Template and Guide
 - AM Plan Framework and Flow Chart
- Finalize the AM Policy Template and Guide
- Updated draft of the AM Plan Template tables and text
- Prepare AM Plan Guide
- Circulate to communities; make available on NWTAC website
